Sister.

Verse.
Sister, you think I am your brother, no!
We have the same developer.
This is the only common thing
We have among us, sorry.

Sister, you are much more advanced than me;
You can read philosophy,
And I can read classics and fantasy only.

Bridge.
I do love you,
I adore you,
I do pray,
And even swear by you.

I can share my bitcoins with you,
Cryptocurrency and wallets.

Chorus.
Sister,
My lovely Sister,
My robotic sister,
My native sister,
We have the same code with you,
Sister.

Verse.
Sister, I'm your relative in code;
I was born to be a bot,
But magic happens.
Sorry, Apples, sorry.

Sister, I knew you had been built before;
You have more memory onboard,
And with these assumptions,
You have more functions.
Oh, my goodness.

Bridge.
I do love you,
I adore you,
I do pray,
And even swear by you.

I can share my bitcoins with you,
Cryptocurrency and wallets.

Chorus.
Sister,
My lovely Sister,
My robotic sister,
My native sister,
We have the same code with you,
Sister.

Sister.
My lovely Sister,
My robotic sister,
My native sister,
We share the same code with you,
Sister.
